PROFILE

Frontend focused full stack engineer with 6+ years shipping complex, data heavy web applications in React, Next.js, and TypeScript. Led a framework migration and API redesign that cut response times 35 percent, built WebGL visualisation for financial risk dashboards, and owns CI/CD that cut mean time to recovery 40 percent.

TECHNICAL SKILLS

Frontend. React, Next.js, TypeScript, JavaScript, Redux, WebGL, HTML5 Canvas, WebSockets, Material UI, Tailwind CSS, Bootstrap, SASS, responsive design, Angular, jQuery, AJAX, Axios, React Router
Backend and data. Java, Spring Boot, Spring MVC, microservices, REST APIs, Hibernate, Node.js, Express, Laravel, Kafka, PostgreSQL, MySQL, MSSQL, Redis
Cloud and DevOps. AWS (EC2, S3, RDS, CodeBuild), Docker, Kubernetes, Helm, OpenShift, Jenkins, GitLab CI, Firebase, Kibana
Security and testing. JWT, OAuth 2.0, Okta SSO, JUnit 5, Mockito, TDD, Log4j, SLF4J

EXPERIENCE

Pennsylvania Department of Corrections | *Software Engineer* | Mechanicsburg, PA | Aug 2023 to Present

- Own end to end delivery of offender management UI in React and TypeScript, covering component architecture, state management, and REST contracts.
- Profile and resolve frontend bottlenecks across rendering, memory, and bundle size to hold responsiveness under sustained load.
- Led migration from AngularJS to Angular 17 and refactored the Spring Boot services to JSON REST, improving response speed 35 percent and scalability on AWS.
- Built CI/CD on GitLab with OpenShift and Docker, automating four weekly releases across 12 services and cutting mean time to recovery 40 percent.

Cleveland State University, Drughelp.Care | *Full Stack Engineer* | Cleveland, OH | Jul 2022 to May 2023

- Built and shipped a public research platform for people affected by the opioid crisis in React and Laravel on AWS EC2 with RDS MySQL, owning releases across DEV, QA, and PROD.
- Designed and deployed an AI chatbot feature plus responsive layouts in SASS and CSS3 media queries, lifting measured site performance 40 percent.

Accenture | *Application Development Analyst* | Hyderabad, India | Aug 2021 to Dec 2021

- Built interactive WebGL data visualisations inside React dashboards, giving financial risk teams real time analytical views over large datasets.
- Delivered banking forms and services for JPMorgan Chase in React, SASS, and Material UI, backed by Spring Boot microservices with JWT and OAuth authentication.
- Automated end to end CI/CD for containerised services on Jenkins, Docker, and Kubernetes, with Kibana log monitoring.

Mize, Inc. | *Junior Software Engineer* | Hyderabad, India | Nov 2018 to Jul 2021

- Developed and integrated REST APIs with React frontends for the Registration and Products modules, delivered to Takeuchi, Bluestar, and Kohler.
- Implemented Single Sign On via OAuth and dynamic PDF generation with iText, raising code quality 30 percent under JUnit 5 and Mockito coverage.

Ajna Networks | *Frontend Development Intern* | Hyderabad, India | May 2018 to Oct 2018

- Built dynamic client facing web pages in React, JavaScript, HTML, CSS, and Bootstrap.

PROJECTS

Expense Management. Real time expense tracker in React, Redux, Axios, and Laravel with MySQL and Firebase.

E-Commerce Platform. MERN storefront built from scratch with Redux state management and Stripe payments.

EDUCATION

Cleveland State University | *M.S. Computer Science* | Jan 2022 to May 2023 | GPA 3.5

Vidya Jyothi Institute of Technology | *B.Tech Computer Science and Engineering* | Sep 2014 to Jul 2018 | GPA 3.2

Certifications. AWS Cloud Computing badge | SQL certification, HackerRank | Runner up, Bugcrowd debugging
