Senior Software Engineer – Frontend

SUMMARY

Full stack Software Engineer with 6+ years of experience in enterprise web and cloud native platforms. Leveraged React, TypeScript, and AWS to lead a front end framework migration and backend service redesign, cutting response times 35% and improving scalability. Built end to end CI/CD pipelines, reducing mean time to recovery 40%. Known for deep ownership of feature lifecycles and mentoring cross functional teams.

SKILLS

Programming Languages: Java, Python, JavaScript, TypeScript

Frontend & UI Development: React, HTML, CSS, WebGL, WebSockets, Next.js, Tailwind CSS, Angular, jQuery, Bootstrap, AJAX

Backend & API Development: Spring Boot, Spring, REST, Microservices

Databases & Caching: PostgreSQL, MySQL, MSSQL, Redis

DevOps & Cloud: AWS, CI/CD, S3, Docker, RedHat OpenShift, GitLab, Jenkins, Helm

Tools & Monitoring: Git, GitHub, Bitbucket, JIRA, IntelliJ IDE, Eclipse IDE

Software Engineering Principles: API Design, Performance Optimization, Scalability, Query Optimization

WORK EXPERIENCE

PENNSYLVANIA DEPARTMENT OF CORRECTIONS

Software Engineer

Mechanicsburg, PA

Aug 2023 – Present

- Owned end to end delivery of offender management UI components built with React and TypeScript, designing RESTful APIs and optimizing performance for demanding workloads.
- Led migration from AngularJS to Angular 17 and refactored Spring Boot microservices, redesigning APIs to JSON REST, boosting response speed 35% and scalability on AWS.
- Orchestrated end to end CI/CD on GitLab with RedHat OpenShift and Docker by automating four weekly releases across 12 services, scaling deployment pipelines, and cutting mean time to recovery by 40% via proactive performance optimization and cross team communication.

ACCENTURE

Application Development Analyst

Hyderabad, India

Jul 2021 – Dec 2021

- Directed migration of JPMorgan Photon platform to v2.6, rebuilding microservices and exposing versioned REST APIs, enabling 25% higher transaction throughput and scalable React/Next.js front ends.
- Built Docker images and Helm charts for Kubernetes, integrated Jenkins CI/CD pipelines delivering daily builds, and maintained 99.9% uptime through proactive performance optimization.
- Revamped Talon deployment pipelines using Git and AWS CodeBuild, accelerating release cycles by 30% and mentoring junior engineers on CI/CD best practices.
- Created interactive data visualizations with WebGL in React dashboards, enhancing analytical capabilities for financial risk teams.

MIZE, INC.

Junior Software Developer

Hyderabad, India

Nov 2018 – Jul 2021

- Designed high performance REST APIs with Spring Boot for a React/TypeScript front end, applying query caching that lifted efficiency 30% and cut PostgreSQL latency 20%.
- Integrated CRM widgets using AJAX, HTML, and CSS into enterprise portals, coordinating cross regional teams to sustain 99.9% availability and deploying monitoring dashboards for rapid issue resolution.
- Migrated static assets to AWS S3 and restyled UI with Tailwind CSS, reducing page load times and improving visual consistency.

EDUCATION

Cleveland State University

Master of Science in Computer Science

Jan 2023

Vidya Jyothi Institute of Technology

Bachelor of Technology in Computer Science & Engineering

Jan 2018
